## Report for the year 2010-2011

These are the activities of the Indian Python Software Society for the period from April 1 2010 to March 31 2011.

Our most significant event was the annual conference. PyCon India 2010. This was the second such conference and it was held in Bangalore. Approximately 600 delegates participated and the event was by all measures an improvement over the 2009 event and a success.

We conducted our first AGM after the 2010 event where we discussed future goals of the society and announced the website and announced memberships for the general public. We currently have approximately 30 individuals as members and 2 organisations.

We obtained a PAN card for the organisation and filed returns for the income and expenditure incurred during the 2009-2010 financial year.
